

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Rec. Nov. 21, 1905

PREFATORY NOTE

This is one of a number of lists upon topics of current interest which have been compiled to meet requests by letter. So far as it could be distributed at all it has hitherto been distributed in typewritten form. The applications have become so numerous that it has now been reduced to print, so as to be available for more general distribution.

* It has no claim to completeness, nor does it even attempt to exhaust the resources of this Library on the subject. Its purpose is merely to present some of the authorities of interest to the general inquirer. The special investigator must, of course, go much further.

A. P. C. GRIFFIN

Chief Bibliographer

HERBERT PUTNAM

Librarian of Congress

Washington, D. C., March 26, 1903

* *Note.*—This issue has received some new titles, but not sufficient to change the character of the List as described above. It consists of discussions not fundamental material.

Washington, D. C., October 18, 1904

(*43d Congress, 1st session. Senate report no. 307.*)

Vol. 1, pp. 79-108 contain "The constitutional power of Congress to regulate commerce among the several states: A. The powers of the national government derived directly from the people; B. The nature and extent of the powers granted by the people to Congress; C. Rule by which this power is to be construed; D. Judicial construction of the words, 'Power to regulate commerce among the several states;' E. This power extends to land as well as to water; F. 'The power to regulate' includes the power to facilitate as well as to disburden commerce; G. Acts of Congress regulating railways; H. State charters do not interfere with the exercise of this power; J. The grant of auxiliary powers confers upon Congress a choice of means, and does not confine it to such means as are indispensably necessary; K. The degree of necessity for the employment of any particular means will not be inquired into by the courts, but must be left to the discretion of Congress; L. Power to appropriate money for internal improvements; M. Power to incorporate a company for the purpose of constructing a railway or canal; N. National right of eminent domain within a state."

40th Congress, 2d session. House report no. 57. Regulation and control of railroads. Report from the Committee on roads and canals. June 9, 1868. 20 pp. 8°.

"The report is noteworthy for the strong ground it took in favor of the widest interpretation of the powers of Congress in the matter of the regulation of the railway traffic. Indeed, the whole report was devoted to an argument on the question whether Congress had this power under the constitution, only the last paragraph containing anything about the expediency of Congress taking any steps in the direction of exercising this power. The report of the majority, which only embraced some seven and one-half pages, was a masterly presentation of the view that the federal government had the broadest power in the premises, and insisting that it would surely, in the course of time, be obliged to exercise the power. Their answer, in brief, to the questions which they were instructed to investigate, was that Congress had full power to provide for the safety of passengers, for uniform and equitable rates of fare, for uniform and equitable rates of freight, and for proper connections with other railroads in regard to all railways engaged in interstate traffic, but that they were not ready to offer

any bill to secure these objects, because they had not the necessary information to enable them to make intelligent recommendations." *E. J. James. "The agitation for the federal regulation of railways."*

United States. *54th Congress, 2d session.* Senate document no. 115.

Letter from the Interstate commerce commission, transmitting the oral testimony taken by the Interstate commerce commission in the investigation of grain rates at Missouri river points. February 8, 1897. 531 pp. 8°.
